

IN THE SPECIFICATION

Please replace the paragraph on page 4, lines 3-4, with the following amended paragraph:

A1 In another implementation, the density of the polyethylene in the polyethylene skin layer is about 0.92 to 0.956 gm/cc.

Please replace the paragraph on page 7, lines 9-12, with the following amended paragraph:

A2 The medium density polyethylene includes polyethylene having a density of about 0.92 - 0.956 g/cc. The medium density polyethylene can be composed of a single medium density polyethylene or a medium density polyethylene containing a minor percentage of hexane or octane component.

Please add the following new paragraph after the paragraph on page 10, lines 1-6:

A3 In a typical embodiment, the metal layer is about 100 - 400 angstroms, although other thicknesses are contemplated.
